# Distributed Systems

COMP90015 2018 Semester 2
Tutorial 01

1. Provide a definition of a Distributed System

2. Briefly explain the difference between a computer network and a distributed system.

3. List three reasons for using a distributed system.

4. Briefly explain four consequences when using distributed systems, i.e. issues that arise that are not present otherwise.

Quick Eclipse Demo

- Create a new Eclipse project
- Add a JAR file (internal / external)
- Build an executable jar file

Extra Question Slide

What are the things to consider when building a distributed system?
